ReTest-2

SPB
DATE :

write a program for the following:
input: < 50 output: poor
input: between 50 and 60 output: Average
input: above 60 below 75 output: Good.
Above 75 excellent.

```
public class marks {
    public static void main(String[] Jargs) {

    Scanner scan = new Scanner();
        int marks = scan.nextInt();

            if (marks < 50)
    System.out.println("poor");
        else if (marks <= 60)
    System.out.println("Average");
        else if (marks < 75) {

    System.out.println("Good");
            else if (marks > 75)

    System.out.println("Excellent");
            else
        System.out.println("Good");
    }
}
```

write a program to print even numbers from 1 to 50

```
public class Even numbers{
public static void main(String[] args){

    for (int i=1; i<=50; i++){
        if (i%2==0){

    System.out.println(i);
    }
}
}
```
